- Spending excessive time in meetings without clear agendas or outcomes, which detracts from productive work hours.
- Rushing through the planning phase without adequately assessing potential risks and challenges.
- Depending on external vendors for critical components that we could develop in-house to ensure better quality and control.

- Investing in R&D for innovative features and improvements in our EV-charging technology.
- Engaging with our customer base through surveys and user groups to gather more comprehensive feedback.
- Promoting team-building activities to strengthen relationships and improve overall team morale and cohesion.

- Overloading team members with too many tasks, leading to burnout and reduced productivity.
- Relying solely on manual testing, which is timeconsuming and prone to errors.
- Delaying code reviews until the end of the sprint, which causes bottlenecks and delays in deployment.
- STOP DOING KEEP DOING
